

Presenting the

ENTOURAGE EFFECT

126 

million Americans report having experienced some kind of pain in the past three months.¹

With limited options available, innovative approaches to occasional pain relief remain a major public need.

INTRODUCING

Hemp Advantage™ Plus

Featuring palmitoylethanolamide (PEA)

Patent-pending formula

featuring organic, broad-spectrum hemp extract & PEA

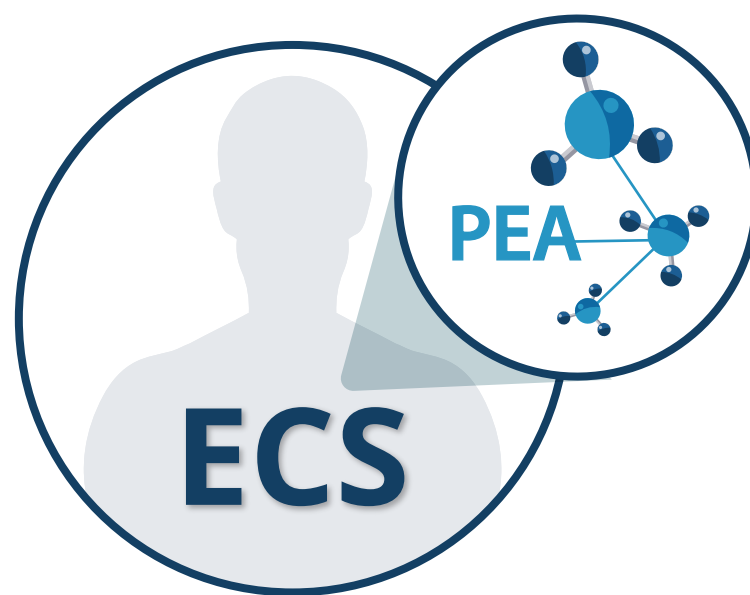

HEMP EXTRACT

PEA

TruQuality™
PURITY, POTENCY, TRANSPARENCY

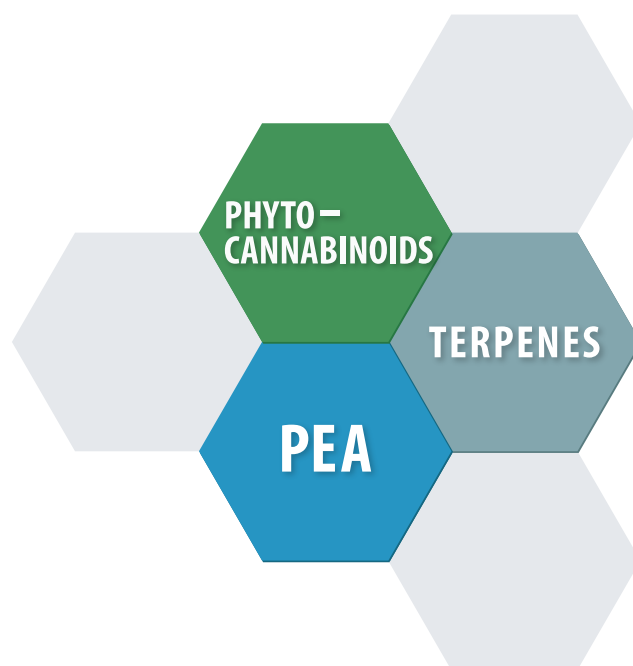

Third-party tested for transparency you can trust:

- Terpenes
- Glyphosate-tested[†] 
- Contaminants
- Heavy metals
- Phytocannabinoid content

Why PEA?

PEA is a bioactive lipid that interacts with the endocannabinoid system (ECS), your body's network of endocannabinoids that communicate with one another to play a vital role in human health.

Entourage effect

Together, phytocannabinoids, terpenes, and PEA may work synergistically to support ECS function and modulate balance in the body—providing greater benefits than any of these compounds alone.

Clinical efficacy

PEA has been studied in over 30 clinical trials on more than 4,000 people worldwide.²

- Supports the body's immune response*
- Supports bodily comfort*
- May improve quality of life*
