

We document our product quality through TruQuality, an innovative transparency program that provides full access to data from third-party analytical tests performed on each lot. From heavy metal and glyphosate testing to active ingredient potency, we have laid it all on the table so that you know exactly what is inside each of our bottles. Hemp Advantage Plus has been certified as glyphosate residue-free by The Detox Project.† Scan the QR code below to visit TruQuality:

Hemp Advantage™ Plus

Featuring palmitoylethanolamide (PEA)

Did you know?

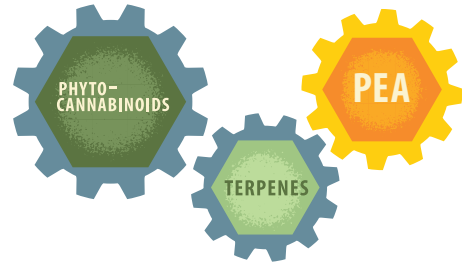

An estimated 126 million (55.7 percent) American adults reported some type of pain in the previous three months.¹ Pain can have a noticeable negative impact on those afflicted, with effects including sleeplessness, decreased activity, and mood changes thus affecting their wellbeing and quality of life. Approaches to mild pain relief remain limited, and more holistic approaches remain a point of public interest.

Introducing Hemp Advantage Plus

Hemp Advantage Plus is a patent-pending formula featuring organic, broad-spectrum hemp extract and a naturally occurring bioactive lipid, palmitoylethanolamide (PEA). PEA is an endocannabinoid-like molecule that interacts with the endocannabinoid system (ECS). Research has indicated the ECS is responsible for regulating physiological processes within the body.

Entourage effect

Combining PEA with hemp extract containing phytocannabinoids and terpenes may provide an entourage effect by supporting endocannabinoid signaling.

Clinically studied

PEA has been the subject of numerous clinical studies performed on more than 4,000 people worldwide, with results that support its clinical potential and safety.

PEA has been indicated to:

- Support bodily comfort*
- Increase subjective measures of quality of life*
- Modulate biochemical pathways associated with the immune system, which may support immune response*
- Help support neurological health, as evidenced by preclinical studies*
